Professional Summary

Junior Software Developer with foundational knowledge in C++, Python, and Node.js. Seeking to apply programming fundamentals and problem-solving skills in a Software Developer role at AT&T. Eager to learn and contribute to production-grade applications while growing technical expertise.

Technical Skills

- **Languages:** C++, Python, Node.js (JavaScript)
- **Focus Areas:** Core programming concepts, syntax proficiency, basic application development

Projects

- **Personal Learning Projects** – Explored C++, Python, and Node.js through self-directed exercises and small applications to build language fundamentals and understand ecosystem tooling.

Education

- **Relevant Coursework / Self-Study:** Data structures, algorithms, object-oriented programming, asynchronous programming (Node.js), Python scripting, C++ memory management

Additional Information

- Strong motivation to transition into professional software development
- Quick learner with focus on clean, maintainable code practices
- Open to mentorship and structured onboarding programs
