1 Professional Summary

BTech Computer Science student (3rd year) with hands-on experience building mobile applications using Flutter and Dart. Proficient in state management (Riverpod), local storage (Hive, SharedPreferences), Firebase services (Authentication, Firestore, Storage), REST APIs, and backend development (FastAPI, Spring Boot). Experienced in developing practical applications with clean architecture and reusable components. Strong problem-solving and debugging skills with a willingness to learn new technologies.

2 Technical Skills

Languages Dart, Java, Python, SQL

Mobile Development Flutter, Android, Responsive UI, Material Design

State Management Riverpod

Local Storage Hive, SharedPreferences

Backend & APIs REST APIs, FastAPI, Spring Boot

Firebase Firebase Authentication, Cloud Firestore, Firebase Storage

Databases MySQL, PostgreSQL

Development Tools Git, GitHub, VS Code, Android Studio, Postman

Core Concepts OOP, Data Structures & Algorithms, Git-based development

3 Projects

Expense Tracker — Flutter Application

Dart, Flutter, Hive

- Developed a Flutter-based expense tracking application with expense creation, editing, deletion, and category-based organization.
- Implemented persistent local data storage using Hive.
- Built reusable Flutter widgets and responsive user interfaces following Material Design principles.
- Applied state management concepts (Riverpod) to maintain application state efficiently.
- Designed with clean architecture and maintainable code practices.

Habit Heatmap — Full-Stack Application

Flutter, Spring Boot, PostgreSQL, Docker, REST APIs

- Developed a habit-tracking application with a visual heatmap for monitoring daily consistency.
- Built the mobile frontend using Flutter with responsive UI components.
- Integrated backend services using Spring Boot, PostgreSQL, and REST APIs for data persistence.
- Implemented API-based communication between frontend and backend layers.
- Containerized backend services with Docker for consistent deployment.

Resume Agent — AI-Powered Application

FastAPI, LangGraph, Asynchronous Processing

- Developed a FastAPI and LangGraph based application for analyzing resumes against job descriptions.
- Implemented workflow-based AI processing with multiple specialized nodes.
- Worked with asynchronous execution and streaming concepts for delivering workflow results.
- Designed APIs for resume analysis, rewriting, and quality evaluation.

4 Education

Bachelor of Technology — Computer Science and Engineering

Currently pursuing, 3rd Year

5 Relevant Coursework

Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Computer Networks, Operating Systems, Software Engineering

6 Strengths

- Strong Flutter/Dart foundation demonstrated through multiple complete projects
- Full-stack experience integrating Flutter frontends with Spring Boot and FastAPI backends
- Proficient in state management with Riverpod and local storage with Hive/SharedPreferences
- Hands-on experience with Firebase Authentication, Firestore, and Storage
- Clean architecture practices with reusable component design
- Git/GitHub proficiency with version control workflows
- Strong problem-solving and debugging skills
- Currently pursuing BTech Computer Science (3rd year) with relevant coursework

- Demonstrated ability to learn new technologies quickly (LangGraph, Docker, AI workflows)
