PROFESSIONAL SUMMARY

BTech Computer Science student (3rd year) with hands-on experience building mobile applications using Flutter and Dart. Proficient in state management (Riverpod), local storage (Hive, SharedPreferences), Firebase services (Authentication, Firestore, Storage), REST API integration, and backend development (FastAPI, Spring Boot). Demonstrated ability to develop practical applications with clean architecture and reusable components. Strong problem-solving and debugging skills with a willingness to learn new technologies.

TECHNICAL SKILLS

- **Languages:** Dart, Java, Python, SQL
- **Mobile Development:** Flutter, Android, Responsive UI, Material Design
- **State Management:** Riverpod
- **Local Storage:** Hive, SharedPreferences
- **Backend & APIs:** REST APIs, FastAPI, Spring Boot
- **Firebase:** Firebase Authentication, Cloud Firestore, Firebase Storage
- **Databases:** MySQL, PostgreSQL
- **Development Tools:** Git, GitHub, VS Code, Android Studio, Postman
- **Core Concepts:** OOP, Data Structures & Algorithms, Git-based development, Clean architecture

PROJECTS

Expense Tracker — Flutter Application

Dart, Flutter, Hive

- Developed a Flutter-based expense tracking application with expense creation, editing, deletion, and category-based organization.
- Used Hive for persistent local data storage.
- Built reusable Flutter widgets and responsive user interfaces.
- Applied state management concepts to maintain application state efficiently.
- Designed with focus on clean and maintainable code architecture.

Habit Heatmap — Full-Stack Application

Flutter, Spring Boot, PostgreSQL, Docker, REST APIs

- Developed a habit-tracking application with a visual heatmap for monitoring daily consistency.

- Built the mobile/frontend side using modern application-development principles.
- Integrated backend services for storing and retrieving user habit data.
- Worked with Spring Boot, PostgreSQL, REST APIs, and Docker on the backend.
- Implemented database persistence and API-based communication between application layers.

Resume Agent — AI-Powered Application

FastAPI, LangGraph, Python

- Developed a FastAPI and LangGraph based application for analyzing resumes against job descriptions.
- Implemented workflow-based AI processing with multiple specialized nodes.
- Worked with asynchronous execution and streaming concepts for delivering workflow results.
- Designed APIs for resume analysis, rewriting, and quality evaluation.

EDUCATION

Bachelor of Technology — Computer Science and Engineering

Currently pursuing, 3rd Year

RELEVANT COURSEWORK

Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Computer Networks, Operating Systems, Software Engineering

KEY QUALIFICATIONS

- Strong Flutter/Dart foundation demonstrated through multiple projects
- Full-stack experience with both frontend (Flutter) and backend (FastAPI, Spring Boot)
- Experience with multiple state management (Riverpod) and local storage solutions (Hive, SharedPreferences)
- Comprehensive Firebase experience (Authentication, Firestore, Storage)
- Clean architecture and reusable component focus evidenced in projects
- Git/GitHub proficiency with Git-based development workflow
- Strong problem-solving and debugging skills
- Currently pursuing CS degree matching qualification requirements
- Willingness to learn new technologies and development practices
